IT Asset Disposition

How to get rid of IT hardware without compromising data security or harming the environment

- ITAD Objectives
  - Compliance
  - Minimise risk to brand
  - Alignment with environmental, social and governance (ESG) strategy
  - Asset value recovery

- Key Factors
  - Increase in product types
  - SD WAN deployments
  - Equipment lease returns
  - Mobile growth
  - Internet of Things devices
  - Trend is towards cloud deployments
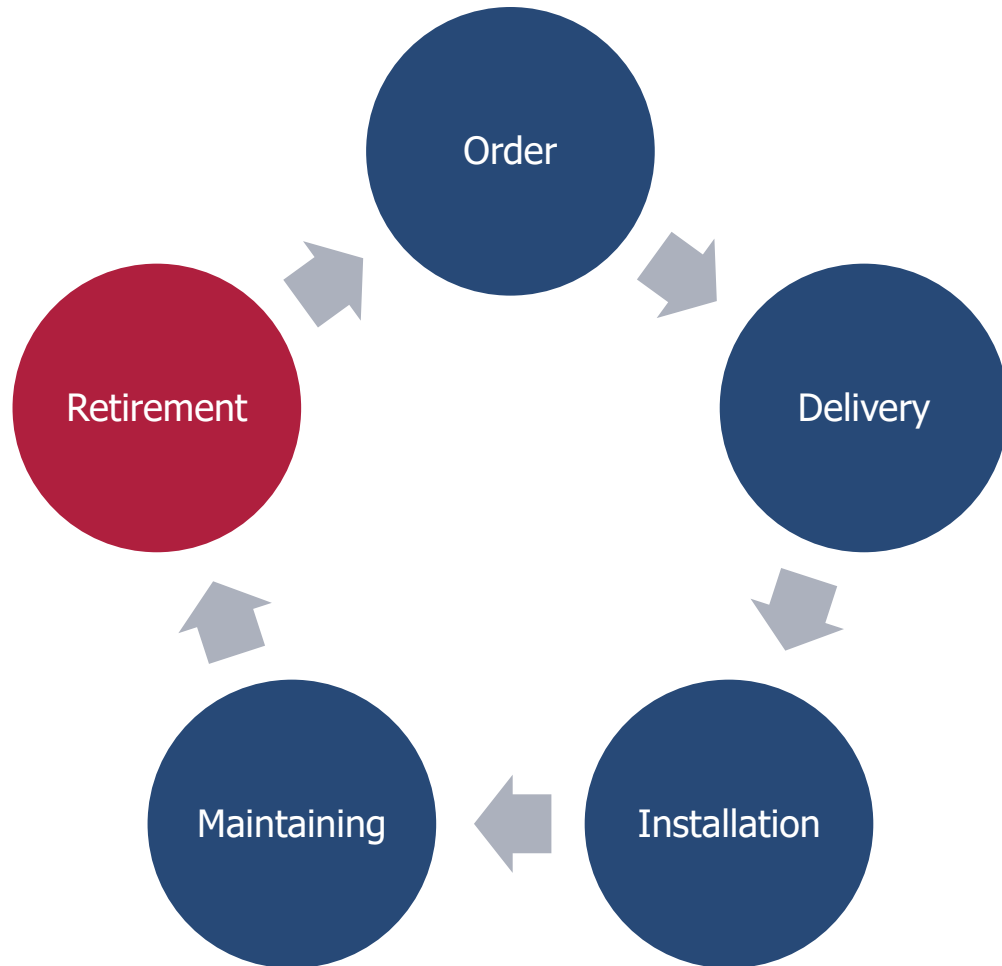

Global reach

Hardware lifecycle

Multi vendor

Tailored solution

Repurposing used or secondary equipment to replace disposed assets

IT Asset Lifecycle Management

Order

Delivery

Installation

Maintaining

Retirement

A typical ITAD project begins with a comprehensive audit to identify the assets designated for disposition and facilitate proper asset management

Our team of manufacturer-specific product experts then provides fair-market appraisals on all decommissioned components to help your team evaluate the most effective options for maximizing value

ITAD is the last stage and too often is an afterthought

Core IT Asset Disposition End to End Service

Deinstallation
Removal from rack
Preparation

Logistics
Collection
Vehicle tracking
Vetted employees
Insurance

Remarketing
Purchase or Invoice
Age and condition
Asset value recovery

Certification

ISO14001
OSHAS18001
R2

Packaging
Palletizing
Hard foam
Bubble wrap

Data Removal
NIST sanitisation/erasure
Factory reset
Hard disk degaussing and shredding

Recycling
Raw material
Compliance
ESG

We deliver a complete hardware lifecycle solution, from supply chain management to end-of-life, providing disposal, refurbishing and sparing opportunities

Secure Equipment Removal

Un-racking and deinstallation

Equipment sorting and removal

Palletizing, shrink-wrapping, and strapping for transport

Our commitment to quality is demonstrated by the way we handle your assets at every stage of the disposition process.

Our chain-of-custody logistics services ensure the highest levels of security during equipment removal and transport.

Onsite or Offsite Data Destruction

📄	Certified Data Erasure

	Disk and Tape Shredding

💾	Disk and Tape Degaussing

If your security protocols call for onsite data destruction, we deploy a mobile disk shredder or use advanced data erasure technology at your location.

We provide Certificates of Data Destruction at the completion of every project, and we submit a complete audit of all data bearing devices for your reference.

Strategic Value and Recovery

Don't let wasteful disposition practices prevent you from earning the maximum return on your hardware investments

As a leading distributor of technology, we understand the secondary IT market

We protect your reputation and compliance status, ensuring your equipment never ends up in the hands of a restricted party

Our dedicated product specialists will help you identify which of your IT assets have value on the secondary market.

We offer flexible remarketing options to help our clients gain ROI, including direct purchase, revenue sharing programs, and credit toward future orders

Westcon-Comstor Services

Extend capabilities. Expand opportunities. Increase margin
